

PROCESS ANALYSIS,
MAINTENANCE & SERVICE CONTRACTS

POWERProduction

Optimize your workflow to maximize profits

POWERProduction is an examination and evaluation of your pressroom workflow and processes.

Are your press operators getting the full benefit from all the features on your manroland press? In today's competitive environment, it is imperative to maintain the highest levels of productivity while minimizing costs and waste to remain a profitable print operation. To meet this need, manroland has developed **POWERProduction**.

What is PowerProduction?

POWERProduction is an examination and evaluation of your pressroom workflow and processes that will identify bottlenecks and inefficiencies in the operation. **POWERProduction** goes further by providing recommendations for corrective actions on how to best address these inefficiencies thus increasing production, capacity, and productivity.

POWERProduction provides you with a manroland-trained print instructor with years of experience in a wide variety of pressroom environments to comprehensively observe and evaluate each phase of the pressroom operation for a period of 32 hours. Press make-ready, production runs, feeder operation, quality checks, and materials handling will be observed by the print trainer as well as printing inputs such as plates, blankets, chemistry, and rollers.

After the observation period the print trainer will sit with your staff for an exit meeting to review preliminary observations. A final **POWERProduction** Report will be prepared and delivered back to the customer within 15 days, outlining where your operation excels and areas that could benefit from improvement, as well as recommended corrective actions for implementation. ■■

Each trained print instructor, with years of experience and a wide variety of exposure to pressroom environments, will comprehensively observe and evaluate each phase of the pressroom operation .

Advantages

- Lower manufacturing costs thru optimized workflow processes
- Improved press utilization
- Increased capacity
- Higher quality
- Improved customer satisfaction

Areas of Focus

- Quality control
- Materials workflow
- Press crew skills
- Press operations
- Safety
- Utilization of printNet
- Process Inputs
- Make Ready Process
- Utilization of press automation

Additional Features

Learn more about manroland's complete range of **printservices** products by contacting **printservices** today at **1.800.mroland** (800.676.5263) or visit us on the web at **www.manroland.us**
