

TRAINING

# PowerPrinters Sheetfed

## Realizing the advantages of press automation

**manroland's PowerPrinters offers a comprehensive training program that focuses on developing press crews in the areas of the printing process and press operating techniques.**

manroland has always been proud of the fact that its customers are consistently rated as the best printers in the industry in terms of print quality, profitability, and business success. We've packed powerful productivity enhancements into every manroland press-innovation that accelerate your press make readies, crank up your production speeds, and make your printing operation more cost competitive than ever before. **Structured training programs focused on your educational requirements, will position your crews to maximize the performance of your manroland press system.**

### **Knowledge is powerful!**

The question is: Are your press operators taking full advantage of the automated features incorporated into your manroland press? Chances are, if they have not benefitted from manroland PowerPrinter training, the answer is "no". That fact could be costing your profits and opportunities on every print job produced!

### **The Answer**

The solution is PowerPrinters training by manroland. As its name indicates, this five day training program ensures that your press crews can take full advantage of the technology incorporated into your manroland press. That will add up to higher production, more business, and more profits for you!

Lead by the manroland Printing Technology Center staff, the instructors are factory trained, skilled printers, with years of training and practical experience that have improved the skills of hundreds of press crews operating manroland presses. They are joined by experts on press service, maintenance, and parts support providing face to face opportunities to meet the manroland support staff.

### Seminar Focus Areas

Conducted at the manroland Printing Technology Center in Westmont, Illinois, the PowerPrinters training focuses on hand-on training, featuring the most up-to-date equipment and computer based training lab, making this the ideal environment for your press operators to learn more about your manroland press. The training is supplemented with classroom instruction designed to ensure your press crew has a through understanding of the lithographic process and key operational aspect of the manroland press such as:

- Sheet travel- Achieving maximum throughput
- Ink and water control systems
- The cylinders-plate, blanket, impression cylinders
- Color Control
- Job Preparation and Management
- Press maintenance
- Accelerated make ready

### Additional Features

Each training participant will receive a technical manual covering the course material, including troubleshooting aids.
