

TRAINING

Technical Training: Mechanical

Enhance the knowledge of on-site personnel

Train press operators and maintenance staff to utilize integrated tools for more accurate diagnostic results.

With manroland's exclusive troubleshooting innovations, repairs can often be facilitated by on-site personnel or with remote assistance from manroland technicians. This is a 32 hour course taught at the customer's facility or at the manroland Print Technology Center in Westmont, Illinois. The course will be taught by a factory-trained instructor with many years of field experience with manroland equipment.

Complete training for every aspect of the press

This course is designed to give the participants a basic mechanical overview of the press. Participants of this class will receive training on the systematic maintenance procedures used to increase uptime and shorten repair time. Training also includes overviews of mechanical subsystems including the sheet transfer system, feeder, feed register, and delivery.

Who should attend

Any plant personnel with responsibilities for mechanical maintenance or troubleshooting are candidates for technical training. Basic knowledge of mechanical systems, precise machine work, and basic press operations are desired. Class size should be limited to five (5) participants per class. ■■

Each manroland press offers not only the best in printing technology, but also includes integrated tools and documentation to improve the press operator's ability to perform standard maintenance and diagnose technical problems.

Advantages

- Effectively navigate the mechanical drawings and parts manual
- Locate and identify components on the press
- Perform basic troubleshooting on press systems and subsystems
- Utilize the portable hand terminal to facilitate troubleshooting
- Perform basic diagnosis using the Last Alarms file
- Understand the routine and non-routine maintenance tasks required

Additional Features

Each training participant will receive a technical manual covering the course materials, including troubleshooting aids.
