

# lubricant 303C

For Higher Quality In Offset Printing

Print quality and profitability are directly related to the choice lubricants.

## Application

The printcom lubricant 303C is a low-viscosity cleaning agent that thoroughly removes lubricant deposits and encrustations from chains, gearbox parts and drive components.

On the cleaned parts, it develops a very thin, but highly adhesive and pressure-resistant lubricating film that reliably protects and lubricates the part until final lubrication.

## Advantages

- Superb cleaning properties
- Interim protection through continual lubrication

Each printcom lubricant has been thoroughly tested by manroland's research and development departments for its mechanical and dynamic properties, its in-press corrosion and wear characteristics, and for its resistance to aging. Use of these products will ensure efficient production processes, with the added benefit of preserving the life and value of your press.

printcom stands for "print competence" and represents manroland's offering of process-compliant system components for the printing industry. Customer satisfaction is our top priority, and the printcom team is here to serve you.

#### Application Area and Approvals

Application Area	chain cleaning
Approvals	ROLAND 200E, ROLAND 300 ROLAND 500, ROLAND 700 ROLAND 900, ROLAND 900 XXL

#### Packaging Units

All packaging units are non-returnable.

Cans	400 ml
Canisters	5 ltr
