

# roller protector 815A

For Higher Quality In Offset Printing

Print quality and profitability are directly related to the choice system components.

## Application

The printcom roller protector 815A is a ready-made paste that protects non-inked rollers from damage caused by friction-induced overheating.

It is used in non-printing units of sheet-fed presses and in heatset and coldset presses running partial webs.

printcom roller protector 815A maintains the ink acceptance properties of the rubber.

## Advantages

- Protects non-inked rollers from damage caused by overheating
- Conditions rollers, thus helps eliminate stripping
- Maintains ink acceptance properties

Each printcom auxiliary product has been thoroughly tested by manroland's research and development departments for its press compatibility and performance.

If used as intended, these products will ensure efficient production processes, with the added benefit of preserving the life and value of your press.

printcom stands for "print competence" and represents manroland's offering of process-compliant system components for the printing industry. Customer satisfaction is our top priority, and the printcom team is here to serve you.

#### Technical Data

Composition	paste
Color	white
Specific Gravity at 20°C	0.866

#### Directions for Use

Apply a small amount of ready-made printcom roller protector 815A to the running rollers. Repeat during longer press runs.

When using printcom roller protector 815A, please observe the safety instructions on the product label and material safety datasheet as well as the relevant regulations for the prevention of industrial accidents and other applicable rules!

#### Important Information

printcom roller protector 815A may not be used on EPDM material!

#### Packaging Units

All packaging units are non-returnable.

Tubs	3 lbs.
------	--------

#### Transport and Storage

cool and dry, protected against direct sunlight and freezing

#### Labeling

Health	0
Flammability	0
Reactivity	0
Protection	B
